WELCOME TO AVCOMM COMMUNICATION SYSTEMS

Avcomm International, Inc. the nation's leading manufacturer and distributor of state of the art noise reduction headsets, intercoms, radios and communications systems for Aviation, Safety, Racing, Fire, Military and Industrial applications, is proud to announce the innovative FREEDOM Wireless™ Headset.

Other wireless headsets under development cannot match the Freedom Wireless™ Headset's 300-500 foot range, and NO other headset comes close to the noise reduction capability, and clarity, of the FREEDOM Wireless™ Headset.

Available in both Behind the Head and Over the Head styles, the versatile FREEDOM Wireless™ Headset is designed for use in multiple applications, including railroads, fire/public safety, military (currently being field tested by the British Army and Navy), racing, agriculture, heavy industry and aviation, particularly ground crew.

The FREEDOM Wireless™ Headset has passed exhaustive, extensive testing under real world conditions, with flying colors.

Upload Campers Database

Here you may upload the data for all campers in a season, complete with name, grade, and any activity preferences. This data must first be obtained from the Thruva camper registration database and then stored in a file on your computer. The procedure to accomplish this is as follows:

1. Open a web browser window and point it to: <https://secure.thruva.com>
2. Login using your Thruva login username and password.
3. Choose Tools|Report Center from the main menu at upper-left.
4. Click on the "Activity Logistics" folder in the list of folders.
5. Click on the "Camper Activities Export" in the list of reports.
6. Select "Download as Tab Delimited" in the "Select Layout" field.
7. Click the [Run Report] button.
8. When the browser asks you to save the file, choose a location on your computer, and a file name to save it as.

Now you can upload this data into the Online Campers Database:

1. Select the week you want to upload: [Week of 06/20/2010 through 06/26/2010]
2. Choose the file you downloaded from Thruva: [Browse...]
3. Then click --> HERE <-- to begin the upload.
